MORPHOSIS ARCHITECTS

## mOrphosis

Founded in 1972, Morphosis is an interdisciplinary practice involved in rigorous design and research that yields innovative, iconic buildings and urban environments. Morphosis is a dynamic and evolving practice that responds to the shifting and advancing social, cultural, political and technological conditions of modern life.

PERSON COLLEGE 5960

## CONTEXT

As an architect our work is rooted in a constant questioning of the context in which we are developing our designs. Within this context one is responsible for balancing project factors ranging from building program and socio-economics to environmental performance and construction processes. A key factor to the development of a design is the gathering and organization of project information. It is within this evolution of design and the expansion of project data that our work gains richness and complexity.

TOTAL AREA OF AGRICULTURE

THE PROPOSED AREA OF AGRICULTURE ON THE NDIA SITE IS

**235 HECTARES**

WITH A 15% COEFFICIENT (~35 HECTARES) DEDUCTED FOR INFRASTRUCTURE, SHADED AREAS FOR WORKERS, ETC.

200 HECTARES X 185 TONNES AVG. YIELD / HA = 40,190 TONNES

TOTAL VEGETABLE PRODUCTION

THE PROPOSED AREA OF AGRICULTURE ON THE NDIA SITE WOULD PRODUCE

**40,000 TONNES**

OF VEGETABLES PER YEAR.

SOURCE: \*WWW.CUESTAROBLE.COM  
\*FACULTY OF FOOD AND AGRICULTURE, UAE UNIVERSITY  
WWW.CFS.UAEU.AC.AE/RESEARCH/EJAS.HTML

40,000 TONNES / 0.156 TONNES VEG / PERSON / YR = 256,410 PEOPLE FED

1 tomato = 200 grams

1 person eats the equivalent of 2.5 large tomatoes in vegetables a day (that's 500 grams or 1.1lbs), and 780 large tomatoes a year (156,000 grams or 350lbs)

1 tonne = 5000 tomatoes

TOTAL # OF PEOPLE PROVIDED FOR

IF THE NDIA SITE MAXIMIZED ITS AGRICULTURAL PRODUCTION, IT COULD FEED

**250,000 PEOPLE**

100% OF THEIR VEGETABLE INTAKE PER YEAR. USING A TUNNEL SYSTEM (WITH HIGH EFFICIENCY HYDROPONICS) COULD INCREASE THIS NUMBER 25%.

SOURCE: USDA FOOD CONSUMPTION STATISTICS  
WWW.USDA.GOV/FACTBOOK/CHAPTERS.PDF

INCREASE IN VEGGIES AS A % INCREASE COMPARED TO AREA INCREASE

% OF QATAR'S CURRENT FARMING

FOR 2005, QATAR PRODUCED 32,705 TONS OF VEGETABLES FROM 1,623 HECTARES OF LAND. THE NDIA PROPOSAL WOULD INCREASE QATAR'S AGRICULTURAL PRODUCTION WITH

**122% MORE VEGETABLES**

**12% MORE AREA**

SOURCE: NATIONAL MASTER PLAN, P.69

	YIELD / HA*	X CROP AREA	= TOTAL YIELD
	250	25	6,250
	350	25	8,750
	100	25	2,500
	400	25	11,400

## BIM

The advancement of tools in the design industry has provided a new paradigm for the role of architects in the development of building projects. At Morphosis we see the most potential for impact of these tools in the early design phase and subsequently during construction documentation and administration.
